

MALIK BAKER

+1 (908) 656-2404 ♦ malikbaker75@gmail.com ♦ <https://malbaker.me>

EDUCATION

B.A. Computer Science, Boston University

Expected May 2024

Relevant Courses: Computer Systems, Data Structures and Algorithms, Software Engineering, Analysis of Algorithms, Analysis of Programming Languages

SKILLS

Languages Python, Java, HTML, CSS, JavaScript, Latex, Markdown, OCaml

Technologies Linux, Bash, MongoDB, MySQL, Git, Docker

EXPERIENCE

I.T. Support Specialist

Oct 2021 - Present

Boston University

Boston, MA

- Conduct technical service and solutions as part of a network of 400+ employees, servicing over 10,000 faculty and staff on the Boston University Charles River Campus and Medical Campus.
- Evaluate ServiceNow tickets and collaborate with senior engineers and team leads to ensure efficient operations within the BU Information Services and Technology network.
- Perform troubleshooting such as running diagnostics, hardware evaluation, and data removal on hundreds of end-of-life Mac and Windows machines to ensure safe termination and disposal of departmental assets.

Production Engineering Fellow (Meta)

May 2022 - Aug 2022

Major League Hacking Fellowship

Springfield, MO (Remote)

- Engineered a production environment for running a web application using a Virtual Private Server, with a connected MySQL database, and a secure web server - all containerized with Docker.
- Developed skills required to keep products running smoothly and scaling efficiently through mentorship with Production Engineers at Meta, along with events and workshops hosted by industry experts.
- Analyzed resource management with system and container metrics through Prometheus monitoring and visualized collected data with Grafana dashboards.
- Automated unit testing and deployment using Bash scripts along with GitHub Actions CI/CD workflows to minimize downtimes by 50% when administering updates.

PROJECTS

Personal Website — *Next.js, React, JavaScript*

Website created as a simple way for people to learn about my work, my interests and how to contact me.

Developer Portfolio — *Python, Flask, JavaScript*

Sample website designed to showcase my technical skills and interests as an aspiring software developer.

Community Discord Bot — *JavaScript, Node.js, Discord.js*

Discord chat bot performing moderation and administrative tasks in a community server with 1500+ members.

Sched-U-Bowl — *Java, Spring Boot, MongoDB, JavaScript*

User-interactive full-stack web application designed as an efficient and secure reservation system for bowling alleys.

LEADERSHIP & ACTIVITIES

Administrator, Co-Founder

Sep 2020 - Present

Boston University Computer Science Discord Server

- Co-founded and lead an administration team for a Discord community with over 1500 members dedicated to facilitating a safe and supportive environment while promoting collaboration, innovation, and having fun.
